

ENVIRONMENTAL WELL-BEING Committee

Mission Statement: Reverencing our Franciscan heritage, we will design ways to inspire, encourage, and educate our members to tie the wellness of the environment to the wellness of the members of the SFV.

Objectives:

1. To gradually introduce across campus compostable paper products beginning Sept. 2012
2. To establish the need for an office of sustainability and research the implications.
3. To expand Campus Sustainability Day and tie it to Food Day.
4. To develop guidelines from the Care for Creation Document.
5. During 2012, identify safe cycling and walking paths, both on campus and in the community, and promote them to the SFV population during 2013
6. By the end of 2012, establish a plan to highlight the campus as a welcoming, natural environment including the grounds, art, and architecture.
7. Begin a series of lunch bag talks on environmental issues open to the entire SFV.
